Iowa nonfarm employment was reported at 1,452,400 for the month of February (not seasonally adjusted), 15,000 higher (1.0%) than February 2010.

Iowa's 12-month average employment is presented as a blue line on the following graph. Iowa's average nonfarm employment peaked in October 2008 at 1,526,400, 47,700 above the peak (January 2001) prior to the previous recession. The current 12-month average reading is now 1,471,400, resulting in an annual average Iowa nonfarm employment level 55,000 below the October 2008 peak and 7,300 below the January 2001 peak. This situation is not unique to Iowa, as current U.S. nonfarm employment is also below the peak experienced prior to the 2001 U.S. recession.

The employment chart also presents Iowa nonfarm employment as a percent of U.S. nonfarm employment as a red line. Iowa's share of U.S. nonfarm employment decreased noticeably from 1999 through 2002. The decline continued at a much slower pace from 2002 through 2007. Iowa's share of U.S. nonfarm employment has been improving since the start of the recession in December 2007; however, the percentage has been relatively flat since March 2010.
